

4:3 Electric Drop-down Projector Screens

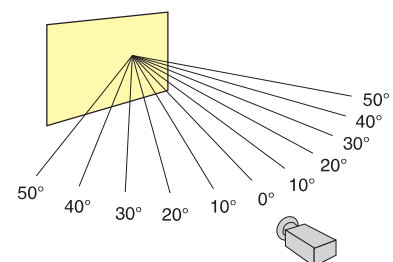

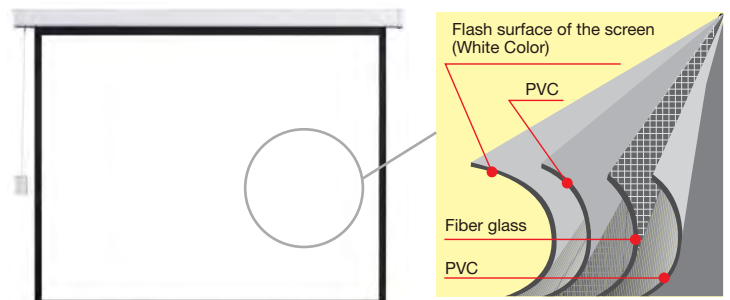

➔ Matte White

Panoview Matte White screens are composed of a sheet of weaved glass-fiber that helps prevent static electricity and creasing. New advances in screen technology allow Panoview screens to offer high definition images visible from almost any angle.

➔ Features

- Multi-layered construction with fiberglass backing helps the screen remain taut and prevents any V-waves from forming.
- The projection surface utilizes unique materials creating a smooth surface for superior image quality. The flexible projection surface is suitable for all occasions and ensures a color-rich reflection and sharp pictures.
- Integrated 12 volt trigger for a professional automation setup with wall switch and remote.
- Panoview screens have a built-in Tubular Motor* that not only enables the control of screen movement more readily and conveniently, but also makes the screen more durable.

Model Number	Screen Description	Image Size (diag.)	Format	Viewing Area	Case Size **	Net Weight (kg)
DE-3100EGS	Matte White	100"	4:3	2030 x 1520	2337 x 78 x 79	13.4
DE-3120EGS	Matte White	120"	4:3	2340 x 1755	2647 x 78 x 79	14.5
